For operators and venues, FIDODARTS delivers powerful business features, including backend support, custom advertising, member system and a full system for creating leagues, tournaments, and Event Count-up games.

All of commercial models support “Charge by Hour” function via FIDO Booking System, and include income reports and game popularity analysis.

## NV-3601P (FIDO BIZ)

If you’re a bar owner or dart venue operator on a budget looking to quickly introduce dart entertainment to your space, choose the NV-3601P (FIDO BIZ).

This latest commercial model combines low cost, high performance, and reliable quality, making it an excellent investment for smaller venues.

It runs game software through a tablet or smartphone and supports the “Charge by Hour” function via FIDO Booking System, making it perfect for venues that need flexible control over their playtime schedules.

## NV-3302P

If you are looking for a solution that’s perfect for venues with big TV and allows for greater flexibility in how you charge customers, the NV-3302P is your best choice.

Although it looks similar to the NV-3601P, it is an industrial-grade solution that includes an embedded industrial computer and HDMI output, making it ideal for venues with large displays like bars or arcades.

It is a plug-and-play system that boots directly into the lobby screen, ready for players to start a game without additional setup.

In addition to supporting the “Charge by Hour” function via FIDO Booking System, you can optionally purchase wireless coin acceptor, wireless bill acceptor, or NFC reader (for top-up card payment) to flexibly adapt to different payment methods.

### **NV-3301P**

If you're running a bar or bowling alley and want a dart machine that connects easily to a big TV with a clean, simple installation, go for the NV-3301P.

This model supports HDMI output and AC socket (on the top of machine). It combines power module, industrial computer, player webcam and NFC Card reader together, so what you need is just a power cord and a network cable to install a dart machine, it's much easier to install NV-3301P than NV-3302P.

Its NFC card reader supports both member card and top-up card payment, helping you manage your venue with greater efficiency.

### **NV-3202P**

If you want the most complete and flagship-level dart experience, the NV-3202P is the model for you.

It comes with a built-in industrial computer and HDMI output, player camera, 23.5-inch screen, physical control buttons, built-in coin acceptor, NFC card reader, and an integrated sound system. All housed in a sleek, upright design that delivers a truly premium dart experience.

Perfect for flagship bars, entertainment centers, or any venue that wants to showcase top-tier performance and style.

You can learn more about the differences between these models in the following Selection Guide series.
